

## November 2022 Update 2.0

Dear Neighbors,

I have two quick announcements for you to take note of, one of which relates to tomorrow, Monday!

- PRERAB has contracted to have the lower portion of DVD's potholes patched starting tomorrow morning, Monday November 28th. 47 holes between tank 1 and the bottom are to be filled. While most of the work can be done leaving one lane open for traffic, a few holes are in the center of the road and may require brief closure to traffic. There may be delays. Traffic direction will be provided, but please take possible delays into account for any traveling you need to do for the next three days or until the work is completed. This patching is critically needed to protect the road surface over the winter until repaving can be done, hopefully next spring/summer.

- At its meeting on November 12<sup>th</sup> the IRA Board named Saturday, January 21<sup>st</sup> as the date for Annual Meeting, which tentatively will start at 10 AM. The meeting will be virtual via Zoom. In April or thereabouts the Board hopes to convene a community social gathering in which we can gather as we normally do at Annual Meetings. Stay tuned for further information on the Annual Meeting, to be out in December, and on the Gathering later this spring.

Thank you and keep well,

Tim Stanton  
IRA President
